## **DETAILED ACTION**

### ***Ex Parte Quayle***

1. This application is in condition for allowance except for the following formal matters:

#### **IN THE ABSTRACT**

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it should be limited to a single paragraph. Correction is required.

#### **IN THE DRAWINGS**

3. The drawings are objected to because in figure 1, each of boxes must be labeled by its own name. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action
4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "20; "22" and "24" (see figure 1). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any

Art Unit: 2851

amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### **IN THE CLAIMS**

5. Claims 3 and 14 are objected to because of the following informalities: there are no periods at the end of the claims. Appropriate correction is required.

#### **PRIORITY**

6. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in European Patent Office on September 24, 2002. It is noted, however, that applicant has not filed a certified copy of the above application as required by 35 U.S.C. 119(b).

#### ***Reasons for Allowance***

7. The following is an examiner's statement of reasons for allowance: Claims 1-14 have been found to be allowable since the prior art of record either alone or in combination, neither discloses nor makes obvious the combination of a method of automatically evaluating an image being processed in a photographic laboratory system into different forms of outputs comprising steps of (1) determining a grade value for each of one or more characteristics properties of the image, along with step (2) of assigning a target value to each of the characteristic image

Art Unit: 2851

properties relative to each available form of output; steps (3) of selecting one of the different forms of output and steps (4) of comparing the grade value to the target value for the selected form of output, as recited in the instant claims of the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art Made of Record***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Slater et al (U.S.Pat. 6,157,435); Holm (U.S.Pat. 6,249,315) and Minamisawa et al (U.S.Pat. 5,210,570) disclose method for determining an exposure printing and image processing and have been cited for technical background.

9. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
